

More Practice

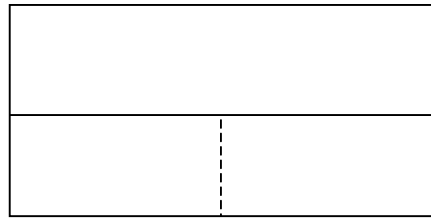

Name _____

Tell whether the missing number is a **part** or the **whole**.

1. $\quad - 33 = 55$ 2. $64 = \square + 17$ 3. $143 = \square - 75$

Draw a diagram. Then write a number sentence to solve the problem.

4. The Blue Hornets scored 45 points in their first basketball game of the season and 56 points in their second game. How many more points did they score in their second game?

_____ ○ _____ = _____

_____ points

5. This fall 32 fewer kids tried out for the junior football team than for the junior soccer team. If 82 kids tried out for soccer, how many kids tried out for football?

_____ ○ _____ = _____

_____ kids

6. Write a comparison problem of your own. Then solve it using a number sentence.

$\square \bigcirc \square = \square$
