

More Practice

Name _____

Draw sets or arrays to solve.

1. Sylvia has 6 dolls on each shelf. There are 7 shelves. How many dolls are there in all?
2. The pet store has 8 birdcages. There are 4 birds in each cage. How many birds are there in all?

Problem Solving

Draw sets or arrays. Then write multiplication sentences to solve.

3. Nora has 4 bags with 7 lollipops in each bag. Greg has 9 bags with 3 lollipops in each bag. Who has fewer lollipops?
4. On Monday, Cynthia saw 3 trees with 5 squirrels each. On Wednesday she saw 5 trees with 4 squirrels each. How many squirrels did Cynthia see in all?

Explain Your Thinking

5. Find the total number of sides in the array. Explain your thinking.
